AI COMPLIANCE ASSESSMENT & RECOMMENDATION

The bidder currently has a compliance score of 0.0/100 and a medium risk rating, with the model flagging a 47% probability of high risk. The only failed check is the "tender_requirements" rule, which shows that no tender has been linked and therefore a tender-specific evaluation cannot be completed. Since the blacklist check passed, the primary gap is the missing tender linkage; the officer should request the appropriate tender reference or clarification before proceeding. This recommendation is decision support only - the final qualification decision remains with the Procurement Officer.

DISCLAIMER: Decision support tool. Final legal authority rests with the designated Procurement Officer.
